PRODUCT INFORMATION

Product Overview

Rat anti Mouse CD4 antibody, clone RM4-5 detects mouse CD4, a 55 KD protein also known as Ly-4 and L3T4. CD4 is a single chain transmembrane glycoprotein which belongs to the immunoglobulin superfamily, and is primarily expressed on peripheral blood monocytes and tissue macrophages. CD4 is also expressed on a subpopulation of regulatory T cells (CD4+CD25+), which play a key role in the maintenance of self tolerance. Rat anti Mouse CD4 antibody, clone RM4-5 useful for in vitro blocking of ligand binding, as well as in vitro CD4+ T cell depletions. Flow Cytometry Use 10ul of the suggested working dilution to label 1x10⁶ cells in 100ul. The Fc region of monoclonal antibodies may bind non-specifically to cells expressing low affinity Fc receptors.
