

# Human GSTP1 ELISA Matched Antibody Pair

**ABPR-0402** 

This product is for research use only and is not intended for diagnostic use.

For illustrative purposes only. To perform the assay the instructions for use provided with the kit have to be used.

## PRODUCT INFORMATION

#### **Intended Use**

This antibody pair set comes with matched antibody pair to detect and quantify protein level of human GSTP1.

## **General Description**

Glutathione S-transferases (GSTs) are a family of enzymes that play an important role in detoxification by catalyzing the conjugation of many hydrophobic and electrophilic compounds with reduced glutathione. Based on their biochemical, immunologic, and structural properties, the soluble GSTs are categorized into 4 main classes: alpha, mu, pi, and theta. This GST family member is a polymorphic gene encoding active, functionally different GSTP1 variant proteins that are thought to function in xenobiotic metabolism and play a role in susceptibility to cancer, and other diseases.

## **Reagents And Materials Provided**

Antibody pair set content:

- Capture antibody: MagicTM rabbit affinity purified polyclonal anti-GSTP1 (100 μg)
- 2. Detection antibody: mouse monoclonal anti-GSTP1, IgG1 Kappa (20 μg)

Note: Reagents are sufficient for at least 1-2 x 96 well plates using recommended protocols.

# **Reconstitution And Storage**

Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -20°C storage immediately after use.
