## PRODUCT INFORMATION

### Intended Use

Quantitative determination of 5-methylcytosine

### General Description

ABPR-JX01B detects 5-methylcytosine in denatured DNA (single strand DNA). It does not react to non-methylated cytosine and other modified cytosine (5-hmC, 5-caC, or 5-fC) in DNA. ABPR-JX01B includes capture and detection antibodies for Sandwich ELISA assays.

### Reagents And Materials Provided

1. Capture Antibody: Rabbit Anti-5-Methylcytosine Monoclonal Antibody, Clone SN342, 50 µg at 1.0 mg/mL in 50% Glycerol/PBS with 0.09% sodium azide, without BSA or other carrier proteins.
2. Detection Antibody: Rabbit Anti-Adenine and Guanine Monoclonal Antibody, Clone SN587 [Biotin], 25 µg at 1.0 mg/mL in 50% Glycerol/PBS with 1% BSA and 0.09% sodium azide.

### Storage

Components Stable for 1 Year at -20°C from date of receipt.

### Specificity

ABPR-JX01B detects 5-methylcytosine in denatured DNA (single strand DNA). It does not react to non-methylated cytosine and other modified cytosine (5-hmC, 5-caC, or 5-fC) in DNA.
