

Anti-CDC42BPA polyclonal antibody (CABT-BL1017)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Immunogen	Synthetic peptide (SGEVRLRQLEQFI-C) corresponding to N terminal amino acids 2-14 of Human CDC42 binding protein kinase alpha.
Isotype	IgG
Source/Host	Goat
Species Reactivity	Human
Purification	Immunogen affinity purified
Conjugate	Unconjugated
Applications	ELISA, IHC-P
Cellular Localization	Cytoplasm. Displays a dispersed punctate distribution and concentrates along the cell periphery, especially at the leading edge and cell-cell junction. This concentration is PH-domain dependent.
Format	Liquid
Buffer	98% Tris buffered saline, 0.5% BSA
Preservative	None
Storage	Shipped at 4°C. Store at -20°C.

BACKGROUND

Introduction The protein encoded by this gene is a member of the Serine/Threonine protein kinase family.

This kinase contains multiple functional domains. Its kinase domain is highly similar to that of the myotonic dystrophy protein kinase (DMPK). This kinase also contains a Rac interactive binding (CRIB) domain, and has been shown to bind CDC42. It may function as a CDC42 downstream effector mediating CDC42 induced peripheral actin formation, and promoting cytoskeletal reorganization. Multiple alternatively spliced transcript variants have been described, and the full-length nature of two of them has been reported. [provided by RefSeq, Jul 2008]
