

Anti-MMP1 polyclonal antibody (CABT-BL2468)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Immunogen	purified, human breast carcinoma pro-MMP-1
Isotype	IgG
Source/Host	Sheep
Species Reactivity	Human
Conjugate	Unconjugated
Applications	WB
Format	Purified
Preservative	None
Storage	Following initial thaw, aliquot and freeze (-20°C). Avoid repeated freeze-thaw.

BACKGROUND

Introduction

Proteins of the matrix metalloproteinase (MMP) family are involved in the breakdown of extracellular matrix in normal physiological processes, such as embryonic development, reproduction, and tissue remodeling, as well as in disease processes, such as arthritis and metastasis. Most MMPs are secreted as inactive proproteins which are activated when cleaved by extracellular proteinases. This gene encodes a secreted enzyme which breaks down the interstitial collagens, types I, II, and III. The gene is part of a cluster of MMP genes which localize to chromosome 11q22.3. Alternative splicing results in multiple transcript variants.[provided by RefSeq, Mar 2009]
