

Anti-PRRC2A (C-terminal) polyclonal antibody (CABT-BL3030)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Immunogen	This antibody is specific for the C Terminus Region of the target protein.
Isotype	IgG
Source/Host	Rabbit
Species Reactivity	Human
Purification	Affinity purified
Conjugate	Unconjugated
Applications	IHC
Buffer	20 mM Potassium Phosphate, 150 mM Sodium Chloride, pH 7.0
Preservative	None
Storage	Store at -20°C. Avoid freeze-thaw cycles.

BACKGROUND

Introduction	A cluster of genes, BAT1-BAT5, has been localized in the vicinity of the genes for TNF alpha and TNF beta. These genes are all within the human major histocompatibility complex class III region. This gene has microsatellite repeats which are associated with the age-at-onset of insulin-dependent diabetes mellitus (IDDM) and possibly thought to be involved with the inflammatory process of pancreatic beta-cell destruction during the development of IDDM. This gene is also a candidate gene for the development of rheumatoid arthritis. Two transcript variants encoding the same protein have been found for this gene. [provided by RefSeq, Dec
