

Anti-RNMT (full length) polyclonal antibody (CABT-BL3169)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Immunogen	Recombinant full length protein (Human) with 6x His tag
Isotype	IgG
Source/Host	Sheep
Species Reactivity	Human
Purification	Whole antiserum
Conjugate	Unconjugated
Applications	WB, IP
Cellular Localization	Nucleus.
Format	Liquid
Preservative	None
Storage	Shipped at 4°C. Upon delivery aliquot and store at -20°C or -80°C. Avoid repeated freeze / thaw cycles.

BACKGROUND

Introduction	RNMT (RNA (guanine-7-) methyltransferase) is a protein-coding gene. Diseases associated with RNMT include bowen-conradi syndrome, and dubowitz syndrome, and among its related super-pathways are Processing of Capped Intron-Containing Pre-mRNA and RNA Pol II CTD phosphorylation and interaction with CE. GO annotations related to this gene include RNA
