

# Anti-RUNX1T1 (C-terminal) polyclonal antibody (CABT-BL3217)

This product is for research use only and is not intended for diagnostic use.

## PRODUCT INFORMATION

Immunogen	a recombinant protein consisting of the C-terminal 212 amino acids of human ETO
Isotype	IgG
Source/Host	Rabbit
Species Reactivity	Human
Conjugate	Unconjugated
Applications	WB, IP
Format	Purified
Preservative	None
Storage	Following initial thaw, aliquot and freeze (-20°C). Avoid repeated freeze-thaw.

## BACKGROUND

Introduction	Core binding factor (CBF) is a heterodimeric transcription factor that binds to the core element of many enhancers and promoters. The protein encoded by this gene represents the alpha subunit of CBF and is thought to be involved in the development of normal hematopoiesis. Chromosomal translocations involving this gene are well-documented and have been associated with several types of leukemia. Three transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Jul 2008]
