

Anti-SERPINA12 (aa 76-220) polyclonal antibody (CABT-BL3278)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Immunogen	Recombinant protein fragment containing a sequence corresponding to a region within amino acids 76 and 220 of SERPINA12 (AAH40857).
Isotype	IgG
Source/Host	Rabbit
Species Reactivity	Human
Purification	Immunogen affinity purified
Conjugate	Unconjugated
Applications	WB
Cellular Localization	Secreted.
Format	Liquid
Size	50 µl
Buffer	20% Glycerol, 0.1M Tris, 0.1M Glycine, pH 7.0
Preservative	None
Storage	Shipped at 4°C. Upon delivery aliquot and store at -20°C or -80°C. Avoid repeated freeze / thaw cycles.

BACKGROUND

Introduction

SERPINA12 (serpin peptidase inhibitor, clade A (alpha-1 antiproteinase, antitrypsin), member 12) is a protein-coding gene. Diseases associated with SERPINA12 include carotid stenosis, and gestational diabetes, and among its related super-pathways are Common Cytokine Receptor Gamma-Chain Family Signaling Pathways. GO annotations related to this gene include serine-type endopeptidase inhibitor activity. An important paralog of this gene is SERPING1.

GENE INFORMATION

Entrez Gene ID	145264
