

Anti-SOLH polyclonal antibody (CABT-BL3406)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Immunogen	A synthetic peptide based on the carboxy terminal end of the zinc finger domain of human Calpain 15.
Isotype	IgG
Source/Host	Rabbit
Species Reactivity	Human
Purification	Immunogen affinity purified
Conjugate	Unconjugated
Applications	WB
Format	Liquid
Buffer	50% Glycerol
Preservative	0.05% Sodium Azide
Storage	Shipped at 4°C. Upon delivery aliquot and store at -20°C. Avoid freeze / thaw cycles.

BACKGROUND

Introduction	The novel BRCA1 protein's epitope, SSKKQKRSHK, was mapped to the cytoplasm of MCF7 cells. Immunohistochemistry analysis has shown that the antigen epitope exhibits positive expression in 65% of breast cancer specimens. Its expression is associated with characteristics that are associated with prognosis of breast cancer, and its sera antibody level may be helpful for breast cancer diagnosis.
