

# Anti-CCL4 polyclonal antibody (CABT-BL892)

This product is for research use only and is not intended for diagnostic use.

## PRODUCT INFORMATION

Immunogen	E.coli derived Recombinant Human MIP-1beta (CCL4)
Isotype	IgG
Source/Host	Rabbit
Species Reactivity	Human
Conjugate	Unconjugated
Applications	sELISA, WB, Neut, IHC
Preservative	None
Storage	-20°C, Avoid freeze / thaw cycles

## BACKGROUND

Introduction	Monokine with inflammatory and chemokinetic properties. Binds to CCR5. One of the major HIV-suppressive factors produced by CD8+ T-cells. Recombinant MIP-1-beta induces a dose-dependent inhibition of different strains of HIV-1, HIV-2, and simian immunodeficiency virus (SIV). The processed form MIP-1-beta(3-69) retains the abilities to induce down-modulation of surface expression of the chemokine receptor CCR5 and to inhibit the CCR5-mediated entry of HIV-1 in T-cells. MIP-1-beta(3-69) is also a ligand for CCR1 and CCR2 isoform B.
