

Anti-BRSV polyclonal antibody (CABT-BL8923)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

| | |
|---------------------------|---|
| Immunogen | Bovine Respiratory syncytial virus (BRSV) |
| Isotype | IgG |
| Source/Host | Goat |
| Species Reactivity | Bovine Respiratory Syncytial Virus |
| Conjugate | Unconjugated |
| Applications | IFA |
| Size | 2 ml |
| Buffer | 0.09% sodium azide |
| Preservative | 0.09% Sodium Azide |
| Storage | Store at 2-7 °C. Do not freeze! |

BACKGROUND

| | |
|---------------------|---|
| Introduction | BRSV was named for its characteristic cytopathic effect, the formation in infected tissue of syncytial cells, giant multinuclear cells formed by the fusion of several cells. BRSV has a predilection for the lower respiratory tract, where it can cause varying degrees of pneumonia by itself. Secondary bacterial infections, frequently involving Mannheimia (Pasteurella) haemolytica, causes disease of greater severity or death. Transmission is via respiratory aerosols or from direct contact with infected cattle. |
