

Rabbit Anti-Streptococcus NADase Inhibitor Polyclonal antibody (CABT-CS099)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Specificity	NADase inhibitor of Streptococcus
Target	Streptococcus NADase Inhibitor
Immunogen	Purified recombinant His-tagged NADase inhibitor of <i>S. dysgalactiae</i> expressed in <i>E. coli</i> .
Isotype	IgG
Source/Host	Rabbit
Species Reactivity	Streptococcus
Conjugate	unconjugated
Applications	WB, IP, ELISA
Format	Liquid antiserum
Size	100 µl
Preservative	0.09% sodium azide
Storage	Sent at 4°C or -20°C and upon arrival, aliquot and store at -20°C. Avoid repeated freeze-thaw cycles.

BACKGROUND

Introduction	NAD (nicotinamide adenine dinucleotide) hydrolyzing enzyme is one of the extracellular enzymes and toxins produced by hemolytic streptococci. NADase inhibitor forms a complex with NADase in cells and only NADase is secreted into culture medium.
