

Chicken Anti-Avian ADV Group II (HEV) Polyclonal antibody (CABT-CS207)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Specificity	ADV
Target	ADV
Isotype	IgY
Source/Host	Chicken
Species Reactivity	ADV
Conjugate	unconjugated
Format	Liquid
Size	1 ml
Buffer	Antiserum
Preservative	None
Storage	Store at -20°C.

BACKGROUND

Introduction	The avian adenoviruses can be divided into three groups, i.e. groups I, II and III. Group I, or conventional adenoviruses, share a common group antigen, distinct from the mammalian adenovirus group antigen. Group II adenoviruses include the viruses of turkey haemorrhagic enteritis (THE), marble spleen disease (MSD) and group II splenomegaly of chickens. These viruses share a common antigen which is distinct from the group antigen of mammalian and
