

Chicken Anti-Avian IAV H5N2 Polyclonal antibody (CABT-CS211)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Specificity	IAV
Target	IAV
Isotype	IgY
Source/Host	Chicken
Species Reactivity	IAV
Conjugate	unconjugated
Format	Liquid
Size	1 ml
Buffer	Antiserum
Preservative	None
Storage	Store at -20°C.

BACKGROUND

Introduction

Avian influenza, known informally as avian flu or bird flu, is a variety of influenza caused by viruses adapted to birds. The type with the greatest risk is highly pathogenic avian influenza (HPAI). Bird flu is similar to swine flu, dog flu, horse flu and human flu as an illness caused by strains of influenza viruses that have adapted to a specific host. Out of the three types of influenza viruses (A, B, and C), influenza A virus is a zoonotic infection with a natural reservoir

almost entirely in birds. Avian influenza, for most purposes, refers to the influenza A virus.
