

Chicken Anti-ALV Subgroup J Polyclonal antibody (CABT-CS212)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Specificity	ALV
Target	ALV
Isotype	IgY
Source/Host	Chicken
Species Reactivity	ALV
Conjugate	unconjugated
Format	Liquid
Size	1 ml
Buffer	Antiserum
Preservative	None
Storage	Store at -20°C.

BACKGROUND

Introduction	Avian leukosis virus (ALV) infects mainly chickens but can also infect pheasants, partridges and quail. It belongs to the Alpharetrovirus genus of the family Retroviridae. It is divided into subgroups A, B, C, D, E and J, depending on their viral envelope proteins which determine immune response and host range. The ALV envelope encases a capsid and a single stranded RNA genome.
