

# Chicken Anti-APV Polyclonal antibody (CABT-CS218)

This product is for research use only and is not intended for diagnostic use.

## PRODUCT INFORMATION

|                    |                 |
|--------------------|-----------------|
| Specificity        | APV             |
| Target             | APV             |
| Isotype            | IgY             |
| Source/Host        | Chicken         |
| Species Reactivity | APV             |
| Conjugate          | unconjugated    |
| Format             | Liquid          |
| Size               | 1 ml            |
| Buffer             | Antiserum       |
| Preservative       | None            |
| Storage            | Store at -20°C. |

## BACKGROUND

|              |   |
|--------------|---|
| Introduction | Avian pneumovirus (APV), previously known as turkey rhinotracheitis virus, causes acute, highly contagious upper respiratory tract diseases in turkeys and chickens. Typical signs of the disease include sneezing, nasal discharge, conjunctivitis, swollen sinuses and a marked drop in egg production. The virus can also infect chickens without exhibiting any clinical signs. |
