

Chicken Anti-M. Synoviae Polyclonal antibody (CABT-CS234)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Specificity	M. Synoviae
Target	M. Synoviae
Isotype	IgY
Source/Host	Chicken
Species Reactivity	M. Synoviae
Conjugate	unconjugated
Format	Liquid
Size	1 ml
Buffer	Antiserum
Preservative	None
Storage	Store at -20°C.

BACKGROUND

Introduction	The bacteria M. synoviae is a member of the mycoplasma genus. It causes disease in the joints, bones and respiratory system of birds. It is found throughout the world and infection may be referred to as Infectious Synovitis, Avian Mycoplasmosis, Infectious Sinusitis and Mycoplasma Arthritis. It is of economic importance because infection can cause a drop in egg production. The disease is most commonly seen in chickens, and transmission occurs both
