

Rabbit Anti-AcmNPV gp64 Polyclonal antibody (CABT-CS299)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Specificity	AcMNPV GP64
Target	AcMNPV GP64
Immunogen	Recombinant AcMNPV Envelope glycoprotein gp64
Isotype	IgG
Source/Host	Rabbit
Species Reactivity	AcMNPV
Purification	Protein A
Conjugate	unconjugated
Applications	WB, ELISA
Format	Liquid
Buffer	PBS
Preservative	None
Storage	This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -80°C. Preservative-Free. Avoid repeated freeze-thaw cycles.

BACKGROUND

Introduction

gp64 is an envelope protein of the baculovirus *Autographa californica* (AcMNPV). It is a phosphoglycoprotein which is located on the surface of both infected cells and budded virions. It is suggested that the virus entry into cells is primarily by the endo.
