

Mouse Anti-Candida Monoclonal antibody, clone ND4 (CABT-CS328)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Antigen Description	Putative β -1,2-mannan epitope in <i>C. albicans</i> blastospore, hyphal and pseudo-hyphal mannoproteins and phospholipomannans
Specificity	This mAb specific to the <i>Candida</i> species
Target	<i>Candida</i>
Isotype	IgG3
Source/Host	Mouse
Species Reactivity	<i>Candida</i>
Clone	ND4
Purification	Protein A
Conjugate	unconjugated
Applications	ELISA, WB, IF, IEM
Format	Liquid
Size	25 μ l, 100 μ l
Buffer	Phosphate buffered saline pH7.2 with 0.095% (w/v) sodium azide
Preservative	0.095% (w/v) sodium azide
Storage	Store as supplied at 2°C - 8°C for up to 1 year.

BACKGROUND

Introduction	Candidiasis is a fungal infection caused by a yeast (a type of fungus) called Candida. Some species of Candida can cause infection in people; the most common is Candida albicans. Candida normally lives on the skin and inside the body, in places such as the mouth, throat, gut, and vagina, without causing any problems.
Keywords	Candida; Candida albicans; C. albicans
