

Duck Anti-D. pteronyssinus Polyclonal Antibody (CABT-CS492)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Specificity	D. pteronyssinus
Target	D. pteronyssinus
Isotype	IgY (Δ Fc)
Source/Host	Duck
Species Reactivity	D. pteronyssinus
Purification	>97%
Conjugate	unconjugated
Applications	ELISA
Format	Liquid
Preservative	None
Storage	Store at 2-8°C for short term. Store at -20°C for long term. Avoid repeated freezing-thawing cycles.

BACKGROUND

Introduction	Dust mite allergens are among the most significant perennial allergens in much of the world, with Dermatophagoides farinae and Dermatophagoides pteronyssinus generally considered to be the most antigenically important. The feces of the mites are responsible for the majority of the antigenicity of the dust mite, and are much more antigenic than the mite bodies.
