

Mouse Anti-ECTV Monoclonal antibody, clone 6C2 (CABT-CS623)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Specificity	This antibody recognizes ECTV and some other orthopoxviruses.
Target	ECTV
Immunogen	Ectromelia virus (ECTV) Strain Munich 1
Isotype	IgG2a
Source/Host	Mouse
Species Reactivity	ECTV
Clone	6C2
Purification	Protein G
Conjugate	unconjugated
Applications	ELISA, IF, WB, IP, FC
Format	Liquid
Size	100 µg
Buffer	PBS, 0.05% (w/v) Sodium Azide
Preservative	0.05% (w/v) Sodium Azide
Storage	Store at -20°C.

BACKGROUND

Introduction

Ectromelia virus (ECTV) is a virus of the family Poxviridae and the genus Orthopoxvirus that causes mousepox, a disease of mice. Mousepox causes skin lesions and generalized disease, which can be fatal. Orthopoxvirus has been associated with smallpox, cowpox, horsepox and monkeypox.
