

Rabbit Anti-IAV H5N1 (Avian Flu) HA Polyclonal Antibody [Biotin] (CABT-CS712)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Specificity	H5N1 Hemagglutinin/HA
Target	H5N1 HA
Immunogen	Recombinant H5N1 HA protein
Isotype	IgG
Source/Host	Rabbit
Species Reactivity	IAV
Purification	Protein A
Conjugate	Biotin
Applications	ELISA
Format	Liquid
Size	100 µg
Buffer	PBS
Preservative	None
Storage	This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -80°C. Preservative-Free. Avoid repeated freeze-thaw cycles.

BACKGROUND

Introduction

Influenza hemagglutinin (HA) is a homotrimeric glycoprotein found on the surface of influenza viruses and is integral to its infectivity. HA is a Class I Fusion Protein, having multifunctional activity as both an attachment factor and membrane fusion protein. Therefore, HA is responsible for binding Influenza virus to sialic acid on the surface of target cells, such as cells in the upper respiratory tract or erythrocytes, causing as a result the internalization of the virus. Secondly, HA is responsible for the fusion of the viral envelope with the late endosomal membrane once exposed to low pH (5.0-5.5).
