

# Rabbit Anti-IAV H5N1 (Influenza A/Vietnam/1203/2004) HA1 Polyclonal Antibody (CABT-CS794)

This product is for research use only and is not intended for diagnostic use.

## PRODUCT INFORMATION

<b>Specificity</b>	Reacts with human and avian H5(H5N1). Cross-reactivity to other HAs not tested.
<b>Target</b>	H5N1 HA
<b>Immunogen</b>	in vivo expressed hemagglutinin (amino acid 1-345) (H5N1) ( A/Vietnam/1203/2004)(H5N1) (GenBank No. AY651334)
<b>Isotype</b>	IgG
<b>Source/Host</b>	Rabbit
<b>Species Reactivity</b>	IAV
<b>Purification</b>	Immunoaffinity chromatography
<b>Conjugate</b>	unconjugated
<b>Applications</b>	WB, ELISA
<b>Format</b>	Liquid
<b>Concentration</b>	2 mg/mL
<b>Size</b>	100 µg
<b>Buffer</b>	PBS
<b>Preservative</b>	None

**Storage**

Store at -20°C; Do not freeze and thaw. Stable for 6-months from the date of shipment when kept at 4°C. Nonhazardous. No MSDS required.

---

## BACKGROUND

**Introduction**

Influenza hemagglutinin (HA) is a homotrimeric glycoprotein found on the surface of influenza viruses and is integral to its infectivity. HA is a Class I Fusion Protein, having multifunctional activity as both an attachment factor and membrane fusion protein. Therefore, HA is responsible for binding Influenza virus to sialic acid on the surface of target cells, such as cells in the upper respiratory tract or erythrocytes, causing as a result the internalization of the virus. Secondly, HA is responsible for the fusion of the viral envelope with the late endosomal membrane once exposed to low pH (5.0-5.5).
