

Rabbit Anti-MPXV D6L Polyclonal antibody (CABT-CS859)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

| | |
|---------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Specificity | MPXV D6L |
| Target | MPXV D6L |
| Immunogen | E. coli - derived recombinant Monkeypox virus/MPXV D6L (Met1-Lys126). |
| Isotype | IgG |
| Source/Host | Rabbit |
| Species Reactivity | MPXV |
| Purification | Antigen affinity purification. |
| Conjugate | unconjugated |
| Applications | ELISA, WB |
| Format | Liquid |
| Size | 50 µg, 100 µg |
| Buffer | PBS, pH 7.4, 50% glycerol, containing 0.05% proclin 300. |
| Preservative | 0.05% proclin 300 |
| Storage | Use a manual defrost freezer and avoid repeated freeze thaw cycles. Store at 4°C for frequent use. Store at -20 to -80 °C for twelve months from the date of receipt. |

BACKGROUND

Introduction

Monkeypox virus (MPV) is a double-stranded DNA, zoonotic virus and a species of the genus Orthopoxvirus in the family Poxviridae. It is a disease that has similar characters to smallpox but with a milder rash and a lower death rate. The virus causes disease in both humans and animals.
