

Mouse Anti-Tau Phospho Thr181 monoclonal antibody, clone N8115E17 (CABT-L163M)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Immunogen	15-mer pT181 Tau peptide conjugated to KLH.
Isotype	IgG1, κ
Source/Host	Mouse
Species Reactivity	Human
Clone	N8115E17
Conjugate	Unconjugated
Applications	IHC-P, WB, ELISA
Format	Purified, Liquid
Concentration	Lot specific
Size	100 µg
Buffer	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide.
Preservative	0.09% sodium azide.
Storage	The antibody solution should be stored undiluted between 2°C and 8°C.
Ship	Wet ice

BACKGROUND

Introduction

Promotes microtubule assembly and stability, and might be involved in the establishment and maintenance of neuronal polarity. The C-terminus binds axonal microtubules while the Nterminus binds neural plasma membrane components, suggesting that tau functions as a linker protein between both. Axonal polarity is predetermined by tau localization (in the neuronal cell) in the domain of the cell body defined by the centrosome. The short isoforms allow plasticity of the cytoskeleton whereas the longer isoforms may preferentially play a role in its stabilization.
