

Rabbit Anti-Human p53 (phospho Ser15) monoclonal antibody, clone 25I72M35 (CABT- L1642)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Specificity	This antibody is predicted to react with chimpanzee, guinea pig, porcine, ovine, bovine, equine, feline, Rhesus monkey and Xenopus based on sequence homology.
Target	TP53
Immunogen	A peptide corresponding to amino acids 9-19 of P04637.
Isotype	IgG
Source/Host	Rabbit
Species Reactivity	Human
Clone	25I72M35
Purification	Protein A Purified
Conjugate	Unconjugated
Applications	ChIP, FC, FRET, ICC, IF, WB
Format	Liquid
Concentration	0.5 mg/ml
Buffer	PBS
Preservative	0.09% Sodium Azide

Storage

Maintain refrigerated at 2-8°C for up to 1 month. For long term storage store at -20°C

BACKGROUND

Introduction

The p53 tumor suppressor protein plays a major role in cellular response to DNA damage and other genomic aberrations. Activation of p53 can lead to either cell cycle arrest and DNA repair, or apoptosis. p53 acetylation at Lys382 is required for recruitment of p300 to the p21 promoter, and is mediated by p300 and CBP acetyltransferases. Acetylation appears to play a positive role in the accumulation of p53 protein in stress responses, and inhibition of deacetylation stabilizes p53.
