

Rabbit Anti-APOA1 monoclonal Antibody, clone 20I31M20 (CABT-L239C)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview	Cap: Anti-APOA1 monoclonal antibody, clone 20I31M20
Target	Human APOA1
Immunogen	synthetic peptide. AA 127–142 of human Apolipoprotein A1
Isotype	IgG1
Source/Host	Rabbit
Species Reactivity	Human
Clone	20I31M20
Purification	Protein A purified
Conjugate	Unconjugated
Applications	WB, ICC/IF, ELSA Recommended antibody pair for sELISA (Cap - Det): CABT-L239C - CABT-L404R
Format	Liquid
Concentration	Lot specific
Size	100 µg
Buffer	PBS
Preservative	0.09% sodium azide

Storage Store antibody at 2-8°C

Ship Wet ice

BACKGROUND

Introduction This gene encodes apolipoprotein A-I, which is the major protein component of high density lipoprotein (HDL) in plasma. The protein promotes cholesterol efflux from tissues to the liver for excretion, and it is a cofactor for lecithin cholesterolacyltransferase (LCAT) which is responsible for the formation of most plasma cholestryl esters. This gene is closely linked with two other apolipoprotein genes on chromosome 11. Defects in this gene are associated with HDL deficiencies, including Tangier disease, and with systemic non-neuropathic amyloidosis.

Keywords APOA1; apolipoprotein A-I; apo-AI; apoA-I; MGC117399;
