

Mouse Anti-Human Rheumatoid Factor monoclonal antibody, clone SG3-28-210.3 (CABT-L4650)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

| | |
|---------------------------|--|
| Product Overview | Mouse Anti-Human Rheumatoid Factor Monoclonal Antibody (no preservative) |
| Target | Human Rheumatoid Factor |
| Immunogen | Purified proteins from patients with IgM cryoglobulins. |
| Isotype | IgG2b |
| Source/Host | Mouse |
| Species Reactivity | Human |
| Clone | SG3-28-210.3 |
| Purification | Protein G Purified |
| Conjugate | Unconjugated |
| Applications | ELISA |
| Format | Purified, Liquid |
| Concentration | 1 mg/ml |
| Size | 500 µg |
| Buffer | PBS only |
| Preservative | None |

| | |
|----------------|---|
| Storage | Short Term: 2-8°C. Long Term: -20°C. Avoid repeated freezing and thawing. |
| Ship | Wet ice |

BACKGROUND

| | |
|---------------------|--|
| Introduction | Antibodies directed against the Fc fragment of immunoglobulin G (IgG) are called rheumatoid factors (RFs). They are heterogenous and are usually IgM antibodies. RFs are used as a marker in individuals with suspected rheumatoid arthritis (RA) or other autoimmune conditions. The normal reference range for RF is less than 15 IU/mL. |
| Keywords | RF;Rheumatoid Factors |
