

Mouse Anti-Tolfenpyrad monoclonal antibody, clone TFP (CABT-L7802)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Immunogen	Tolfenpyrad with carrier protein
Isotype	IgG
Source/Host	Mouse
Species Reactivity	N/A
Clone	TFP
Purification	Affinity Purified
Conjugate	Unconjugated
Applications	ELISA, LFIA
Format	Liquid
Concentration	Lot specific
Size	1 mg
Buffer	PBS
Preservative	None
Storage	Store at -20°C.
Ship	Wet ice

BACKGROUND

Introduction

Tolfenpyrad is an aromatic amide obtained by formal condensation of the carboxy group of 4-chloro-3-ethyl-1-methylpyrazole-5-carboxylic acid with the amino group of 1-[4-(4-methylphenoxy)phenyl]methylamine. It has a role as a mitochondrial NADH:ubiquinone reductase inhibitor, an agrochemical, an EC 1.3.5.1 [succinate dehydrogenase (quinone)] inhibitor and an antifungal agent. It is a pyrazole insecticide, an aromatic amide, an aromatic ether and an organochlorine compound.

Keywords

Tolfenpyrad; TFP
