

Mouse Anti-Fluazinam monoclonal antibody, clone FZN (CABT-L7815)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Immunogen	Fluazinam with carrier protein
Isotype	IgG
Source/Host	Mouse
Species Reactivity	N/A
Clone	FZN
Purification	Affinity Purified
Conjugate	Unconjugated
Applications	ELISA, LFIA
Format	Liquid
Concentration	Lot specific
Size	1 mg
Buffer	PBS
Preservative	None
Storage	Store at -20°C.
Ship	Wet ice

BACKGROUND

Introduction

MF: C13H4Cl2F6N4O4; CAS:79622-59-6

Fluazinam is a member of the class of aminopyridines that is 2-amino-5-(trifluoromethyl)pyridine in which one of the amino hydrogens is replaced by a 3-chloro-2,6-dinitro-4-(trifluoromethyl)phenyl group. A fungicide used to control grey mould, downy mildew and other fungal pathogens. It has a role as an apoptosis inducer, an allergen, a xenobiotic, an environmental contaminant and an antifungal agrochemical. It is a C-nitro compound, a chloropyridine, an aminopyridine, a secondary amino compound, a member of monochlorobenzenes and a member of (trifluoromethyl)benzenes.
