

# Goat Anti-Papillomavirus Polyclonal antibody (CABT-RM239)

This product is for research use only and is not intended for diagnostic use.

## PRODUCT INFORMATION

<b>Specificity</b>	Papillomavirus group including HPV types 11 & 16, Bovine Papillomavirus. Nonreactive with normal tissue and cultured cells
<b>Target</b>	Papillomavirus
<b>Immunogen</b>	Bovine Papillomavirus
<b>Source/Host</b>	Goat
<b>Species Reactivity</b>	BPV
<b>Purification</b>	>95%
<b>Conjugate</b>	unconjugated
<b>Applications</b>	ELISA, LFIA, IFA, WB, IHC
<b>Format</b>	Liquid
<b>Size</b>	500 µl
<b>Buffer</b>	10 mM Phosphate Buffered Saline, pH 7.2
<b>Preservative</b>	0.1% Sodium Azide
<b>Storage</b>	Short Term: 2-8°C. Long Term: -20°C. Avoid repeated freezing and thawing.
<b>Ship</b>	Cold Packs

## BACKGROUND

**Introduction**

Bovine papillomaviruses (BPV) are a paraphyletic group of DNA viruses of the subfamily Firstpapillomavirinae that are common in cattle. Infection causes warts (papillomas and fibropapillomas) of the skin and alimentary tract, and more rarely cancers of the alimentary tract and urinary bladder. They are also thought to cause the skin tumour equine sarcoid in horses and donkeys.

**Keywords**

Bovine papillomaviruses; BPV; papillomaviruses
