

## Anti-IL1B monoclonal antibody, clone KL2C-2 (CABT-WN1685)

This product is for research use only and is not intended for diagnostic use.

## PRODUCT INFORMATION

| Mouse Monoclonal Antibody to Human IL1B molecule  |
|---|
| 2-1 refers to two proteins, IL-1alpha and IL-1beta which are the products of distinct genes, but which are recognized by the same cell surface receptors. IL-1beta is a potent immuno-nodulator which mediates a wide range of immune and inflammatory responses including the ctivation of B and T cells. The antibody reacts with human interleukin-1beta (IL-1beta) and aboon IL-1beta. The antibody does not recognize mouse IL-1beta or human IL-1alpha or other ytokines. The antibody can neutralize the bioactivity of natural or recombinant IL-1beta. |
| _1B   |
| tecombinant human IL-1 beta   |
| gG1   |
| <b>1</b> ouse   |
| flouse, Rat, Human, Rhesus monkey   |
| L2C-2   |
| he antibody was purified by affinity chromatography.  |
| Inconjugated  |
