

Rat Anti-Mouse M-CSF Responsive Cells Monoclonal Antibody, clone FS-NQ69 (CABT-Z322R)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview	This antibody detects all M-CSF responsive cells in the bone marrow and the majority of other myeloid blood cell precursors. The antigen is detected on a broad development range of macrophage precursor cells up to the monocytic level. The antibody is also very suitable for the identification of myeloid haematopoietic islands in various organs, and for embryonic studies.
Immunogen	Mouse macrophage cell lines.
Isotype	IgM
Source/Host	Rat
Species Reactivity	Mouse
Clone	FS-NQ69
Purification	Partially purified
Conjugate	Unconjugated
Applications	IHC Recommended dilution: IHC-F: 1:20 -1:50 IHC-P: 1:20, Proteinase K pretreatment for antigen retrieval is recommended.
Format	Liquid
Concentration	Lot specific
Size	1 ml

Buffer	Phosphate buffered saline, pH 7.2, and 0.05% sodium azide as a preservative.
Preservative	0.05% sodium azide
Storage	Stock solution or aliquots thereof: 1 year at -20°C. Avoid repeated thawing and freezing
Ship	Wet ice

BACKGROUND

Keywords	M-CSF Responsive Cells;macrophage precursors;Myelopoietic Cells
