

Rabbit Anti-Mouse TNF-alpha monoclonal antibody, clone S134 (CABT-ZB663)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Specificity	It reacts with Mouse TNF-alpha
Target	TNF-alpha
Immunogen	Recombinant Mouse TNF-alpha/TNFA/TNFSF2 Protein
Isotype	IgG
Source/Host	Rabbit
Species Reactivity	Mouse
Clone	S134
Purification	Protein A purified
Conjugate	Unconjugated
Applications	ELISA(cap) This antibody will detect TNF-alpha in antibody pair set. [ABPR-ZB242]
Preparation	This antibody was obtained from a rabbit immunized with purified, recombinant Mouse TNF-alpha / TNFA / TNFSF2.
Format	Purified, Liquid
Concentration	Lot specific
Size	50 µL, 100 µL, 1 mL
Buffer	PBS

Preservative	None
Storage	This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -80°C. Preservative-Free. Avoid repeated freeze-thaw cycles.
Ship	Wet ice

BACKGROUND

Introduction	Tumor necrosis factor alpha (TNF-alpha), also known as TNF, TNFA or TNFSF2, is the prototypic cytokine of the TNF superfamily, and is a multifunctional molecule involved in the regulation of a wide spectrum of biological processes including cell proliferation, differentiation, apoptosis, lipid metabolism, and coagulation. Two receptors, TNF-R1 (TNF receptor type 1; CD120a; p55/60) and TNF-R2 (TNF receptor type 2; CD120b; p75/80), bind to TNF-alpha. TNF-alpha protein is produced mainly by macrophages, and large amounts of this cytokine are released in response to lipopolysaccharide, other bacterial products, and Interleukin-1 (IL-1). TNF-alpha is involved in fighting against the tumorigenesis, thus, is regarded as a molecular insight in cancer treatment.
