

Human FEM1B blocking peptide (CDBP1178)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview	F1A alpha peptide (human)
Antigen Description	This gene encodes an ankyrin repeat protein that belongs to the death receptor-associated family of proteins and plays a role in mediating apoptosis. The encoded protein is also thought to function in the replication stress-induced checkpoint signaling pathway via interaction with checkpoint kinase 1.
