

Mouse GABPB2 blocking peptide (CDBP1314)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview	Blocking/Immunizing peptide for anti-Gabpb2 (mouse) antibody
Antigen Description	GABPB2 (GA binding protein transcription factor, beta subunit 2) is a protein-coding gene. Diseases associated with GABPB2 include herpes simplex, and hepatitis b. GO annotations related to this gene include protein homodimerization activity and transcription regulatory region DNA binding. An important paralog of this gene is ANKRD39.
Species	Mouse
Conjugate	Unconjugated
Applications	Apuri, BL, ELISA
Format	Lyophilized powder
Size	100 µg
Preservative	None
Storage	Shipped at ambient temperature, store at -20°C.

GENE INFORMATION

Gene Name	Gabpb2 GA repeat binding protein, beta 2 [Mus musculus]
Official Symbol	GABPB2
Synonyms	GABPB2; GA repeat binding protein, beta 2; GA-binding protein subunit beta-2; GABPB-2; GABP subunit beta-2; GABP subunit beta-2-1; GA-binding protein beta-2-1; AV050852; Gabpb2-1; 5830427M07; 1810015F01Rik; 9430006E19Rik; A430024B14Rik;
Entrez Gene ID	213054

mRNA Refseq	NM_029885
Protein Refseq	NP_084161
Pathway	Mitochondrial Gene Expression, organism-specific biosystem;
Function	protein heterodimerization activity; protein homodimerization activity; transcription regulatory region DNA binding;
