

## Human NDC80 blocking peptide (CDBP1466)

This product is for research use only and is not intended for diagnostic use.

### PRODUCT INFORMATION

Product Overview	Blocking/Immunizing peptide for anti-HEC1 antibody
Antigen Description	This gene encodes a component of the NDC80 kinetochore complex. The encoded protein consists of an N-terminal microtubule binding domain and a C-terminal coiled-coiled domain that interacts with other components of the complex. This protein functions to organize and stabilize microtubule-kinetochore interactions and is required for proper chromosome segregation. [provided by RefSeq, Oct 2011]
Species	Human
Conjugate	Unconjugated
Applications	Apuri, BL, ELISA
Format	Lyophilized powder
Size	100 µg
Preservative	None
Storage	Shipped at ambient temperature, store at -20°C.

### GENE INFORMATION

Gene Name	<a href="#">NDC80 NDC80 kinetochore complex component [ Homo sapiens (human) ]</a>
Official Symbol	NDC80
Synonyms	NDC80; NDC80 kinetochore complex component; HEC; HEC1; TID3; KNTC2; HsHec1; hsNDC80; kinetochore protein NDC80 homolog; kinetochore associated 2; kinetochore protein Hec1; kinetochore-associated protein 2; highly expressed in cancer protein; retinoblastoma-

associated protein HEC; NDC80 kinetochore complex component homolog; NDC80 homolog, kinetochore complex component; highly expressed in cancer, rich in leucine heptad repeats;
