

Human LARP1B blocking peptide (CDBP1726)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview	Blocking/Immunizing peptide for anti-LARP2 antibody
Antigen Description	This gene encodes a protein containing domains found in the La related protein of Drosophila melanogaster. La motif-containing proteins are thought to be RNA-binding proteins, where the La motif and adjacent amino acids fold into an RNA recognition motif. The La motif is also found in proteins unrelated to the La protein. Alternative splicing has been observed at this locus and multiple variants, encoding distinct isoforms, are described. Additional splice variation has been identified but the full-length nature of these transcripts has not been determined. [provided by RefSeq, Jun 2013]
Species	Human
Conjugate	Unconjugated
Applications	Apuri, BL, ELISA
Format	Lyophilized powder
Size	100 µg
Preservative	None
Storage	Shipped at ambient temperature, store at -20°C.

GENE INFORMATION

Gene Name	LARP1B La ribonucleoprotein domain family, member 1B [Homo sapiens (human)]
Official Symbol	LARP1B
Synonyms	LARP1B; La ribonucleoprotein domain family, member 1B; LARP2; la-related protein 1B; la-

related protein 2; la ribonucleoprotein domain family member 2; La ribonucleoprotein domain family, member 2;

Entrez Gene ID	55132
mRNA Refseq	NM_001278604.1
Protein Refseq	NP_001265533.1
UniProt ID	Q659C4
Chromosome Location	4q28.2
Function	poly(A) RNA binding;
