This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview	Blocking/Immunizing peptide for anti-NGFRAP1 antibody
Antigen Description	NGFRAP1 (nerve growth factor receptor (TNFRSF16) associated protein 1) is a protein-coding gene. Diseases associated with NGFRAP1 include aicardi syndrome, and neuronitis. GO annotations related to this gene include cysteine-type endopeptidase activator activity involved in apoptotic process and death receptor binding. An important paralog of this gene is BEX1.
