

Human CUL9 blocking peptide (CDBP2195)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

| | |
|----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Product Overview | Blocking peptide for anti-PARC antibody |
| Antigen Description | CUL9 (cullin 9) is a protein-coding gene. Diseases associated with CUL9 include peyronie's disease, and peyronies disease. GO annotations related to this gene include ubiquitin protein ligase binding. An important paralog of this gene is CUL7. |
| Species | Human |
| Conjugate | Unconjugated |
| Applications | BL |
| Format | Liquid |
| Concentration | 200 µg/ml |
| Size | 50 µg |
| Buffer | PBS containing 0.02% sodium azide |
| Preservative | 0.02% Sodium Azide |
| Storage | Store at -20°C, stable for one year. |

GENE INFORMATION

| | |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Gene Name | CUL9 cullin 9 [Homo sapiens (human)] |
| Official Symbol | CUL9 |
| Synonyms | CUL9; cullin 9; PARC; H7AP1; cullin-9; CUL-9; UbcH7-associated protein 1; parkin-like cytoplasmic p53 binding protein; p53-associated parkin-like cytoplasmic protein; |

| | |
|----------------------------|-----------------------------------------------------------------------------------|
| Entrez Gene ID | 23113 |
| mRNA Refseq | NM_015089.3 |
| Protein Refseq | NP_055904.1 |
| UniProt ID | Q8IWT3 |
| Chromosome Location | 6p21.1 |
| Function | ATP binding; protein binding; ubiquitin protein ligase binding; zinc ion binding; |
