This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

|---------------------|---|
| Product Overview | Blocking/Immunizing peptide for anti-SNX18/SNAG1 antibody |
| Antigen Description | This gene encodes a member of the sorting nexin family. Members of this family contain a phox (PX) domain, which is a phosphoinositide binding domain, and are involved in intracellular trafficking. This protein does not contain a coiled coil region, like some family members, but contains a SH3 domain. Multiple transcript variants encoding different isoforms have been found for this gene.
