

CRIM1 blocking peptide (CDBP5172)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Antigen Description	The protein encoded by this gene belongs to the BCL2 protein family. BCL2 family members form hetero- or homodimers and act as anti- or pro-apoptotic regulators that are involved in a wide variety of cellular activities. Overexpression of this gene has been shown to induce apoptosis in cells. Three alternatively spliced transcript variants encoding two distinct isoforms have been reported for this gene. [provided by RefSeq, May 2009]
----------------------------	---

Conjugate	Unconjugated
------------------	--------------

Applications	Used as a blocking peptide in immunoblotting applications.
---------------------	--

Format	Liquid
---------------	--------

Concentration	200 µg/mL
----------------------	-----------

Size	0.05 mg
-------------	---------

Preservative	None
---------------------	------

Storage	-20°C
----------------	-------

GENE INFORMATION

Gene Name	BCL2L14 BCL2-like 14 (apoptosis facilitator) [Homo sapiens (human)]
------------------	---

Official Symbol	CRIM1
------------------------	-------

Synonyms	BCL2L14; BCL2-like 14 (apoptosis facilitator); BCLG; apoptosis facilitator Bcl-2-like protein 14; bcl2-L-14; apoptosis regulator BCL-G
-----------------	--

Entrez Gene ID	79370
-----------------------	-----------------------

mRNA Refseq	NM_030766
--------------------	---------------------------

Protein Refseq	NP_110393
UniProt ID	Q9BZR8
Pathway	Direct p53 effectors
Function	protein binding; protein kinase binding
