

LZTR1 blocking peptide (CDBP5711)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Antigen Description	This gene encodes a member of the BTB-kelch superfamily. Initially described as a putative transcriptional regulator based on weak homology to members of the basic leucine zipper-like family, the encoded protein subsequently has been shown to localize exclusively to the Golgi network where it may help stabilize the Golgi complex. Deletion of this gene may be associated with DiGeorge syndrome. [provided by RefSeq, Jul 2008]
Conjugate	Unconjugated
Applications	Used as a blocking peptide in immunoblotting applications.
Format	Liquid
Concentration	200 µg/mL
Size	0.05 mg
Preservative	None
Storage	-20°C

GENE INFORMATION

Gene Name	LZTR1 leucine-zipper-like transcription regulator 1 [Homo sapiens (human)]
Official Symbol	LZTR1
Synonyms	LZTR1; leucine-zipper-like transcription regulator 1; BTBD29; LZTR-1; SWNTS2; leucine-zipper-like transcriptional regulator 1; leucine-zipper-like regulator-1
Entrez Gene ID	8216
mRNA Refseq	NM_006767

Protein Refseq

[NP_006758](#)

UniProt ID

Q8N653

Function

sequence-specific DNA binding transcription factor activity
