| <b>Antigen Description</b> | This gene encodes a cytosolic adapter protein that plays a central role in the innate and adaptive immune response. This protein functions as an essential signal transducer in the interleukin-1 and Toll-like receptor signaling pathways. These pathways regulate that activation of numerous proinflammatory genes. The encoded protein consists of an N-terminal death domain and a C-terminal Toll-interleukin1 receptor domain. Patients with defects in this gene have an increased susceptibility to pyogenic bacterial infections. Alternate splicing results in multiple transcript variants. [provided by RefSeq, Feb 2010] |

|                  |              |
|------------------|--------------|
| <b>Conjugate</b> | Unconjugated |
|------------------|--------------|

|                     |                                                            |
|---------------------|------------------------------------------------------------|
| <b>Applications</b> | Used as a blocking peptide in immunoblotting applications. |
|---------------------|------------------------------------------------------------|

|               |        |
|---------------|--------|
| <b>Format</b> | Liquid |
|---------------|--------|

|                      |           |
|----------------------|-----------|
| <b>Concentration</b> | 200 µg/mL |
|----------------------|-----------|

|             |         |
|-------------|---------|
| <b>Size</b> | 0.05 mg |
|-------------|---------|

|                     |      |
|---------------------|------|
| <b>Preservative</b> | None |
|---------------------|------|

|                |       |
|----------------|-------|
| <b>Storage</b> | -20°C |
|----------------|-------|

### GENE INFORMATION

|                  |                                                                                            |
|------------------|--------------------------------------------------------------------------------------------|
| <b>Gene Name</b> | <a href="#">MYD88 myeloid differentiation primary response 88 [ Homo sapiens (human) ]</a> |
|------------------|--------------------------------------------------------------------------------------------|

|                        |       |
|------------------------|-------|
| <b>Official Symbol</b> | MYD88 |
|------------------------|-------|

|                 |                                                                                                                                                                        |
