

IAV H1N1 NP blocking peptide (CDBP6085)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Conjugate	Unconjugated
Applications	Used as a blocking peptide in immunoblotting applications.
Format	Liquid
Concentration	200 μg/mL
Size	0.05 mg
Preservative	None
Storage	-20°C

BACKGROUND

Introduction	Influenza A virus causes influenza in birds and some mammals and is the only species of
miloduotion	influenzavirus A. Influenzavirus A is a genus of the Orthomyxoviridae family of viruses. Strains
	of all subtypes of influenza A virus have been isolated from wild birds, although disease is
	uncommon. Some isolates of influenza A virus cause severe disease both in domestic poultry
	and, rarely, in humans. Occasionally, viruses are transmitted from wild aquatic birds to
	domestic poultry, and this may cause an outbreak or give rise to human influenza pandemics.
Keywords	Orthomyxoviridae; Influenzavirus A; Influenza A virus; Influenza A virus H5N1 NP; H5N1 NP; H5N1; NP; Nucleocapsid protein
