

Rat Anti-Amphotericin B monoclonal antibody, clone 939110 (CPBT-LL015)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Antigen Description	Amphotericin B is an antifungal and anti-helminth drug used in clinics. It was originally isolated from <i>Streptomyces nodosa</i> .
Specificity	Universal. Cross reactivity to other molecules not tested.
Target	Amphotericin B
Immunogen	Amphotericin-B conjugated to a carrier.
Isotype	IgG1
Source/Host	Rat
Species Reactivity	N/A
Clone	939110
Purification	Purified by Protein-A affinity chromatography to >95%.
Conjugate	Unconjugated
Applications	ELISA, WB
Format	Liquid
Concentration	Lot specific
Size	100 µg
Buffer	Prepared as a solution in PBS, pH 7.2, sterile filtered with no other additives or preservatives.

Preservative	None
Storage	Store at 4°C in fridge for short term use. May aliquot and store at -20°C for long term.
Ship	Wet ice

BACKGROUND

Keywords	Fungizone;Mysteclin-F;AmBisome
