

Human HIST1H3H blocking peptide (DAG-P0049)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Antigen Description	Histones are basic nuclear proteins that are responsible for the nucleosome structure of the chromosomal fiber in eukaryotes. Two molecules of each of the four core histones (H2A, H2B, H3, and H4) form an octamer, around which approximately 146 bp of DNA is wrapped in repeating units, called nucleosomes. The linker histone, H1, interacts with linker DNA between nucleosomes and functions in the compaction of chromatin into higher order structures. This gene is intronless and encodes a member of the histone H3 family. Transcripts from this gene lack polyA tails but instead contain a palindromic termination element. This gene is found in the small histone gene cluster on chromosome 6p22-p21.3. [provided by RefSeq, Jul 2008]
----------------------------	--

Conjugate	Unconjugated
Applications	BL
Sequence Similarities	Belongs to the histone H3 family.
Format	Liquid
Buffer	Information available upon request.
Preservative	None
Storage	Store at +4°C short term (1-2 weeks). Aliquot and store at -20°C or -80°C. Avoid repeated freeze / thaw cycles. Information available upon request.

GENE INFORMATION

Gene Name	HIST1H3H histone cluster 1, H3h [Homo sapiens (human)]
Official Symbol	HIST1H3H

Synonyms	HIST1H3H; histone cluster 1, H3h; H3/k; H3FK; H3F1K; histone H3.1; histone H3/k; histone 1, H3h; H3 histone family, member K;
Entrez Gene ID	8357
mRNA Refseq	NM_003536.2
Protein Refseq	NP_003527.1
UniProt ID	P68431
Chromosome Location	6p22.1
Pathway	Alcoholism, organism-specific biosystem; Alcoholism, conserved biosystem; Amyloids, organism-specific biosystem; Cell Cycle, organism-specific biosystem; Cell Cycle, Mitotic, organism-specific biosystem; Cellular Senescence, organism-specific biosystem; Cellular responses to stress, organism-specific biosystem; Chromatin modifying enzymes, organism-specific biosystem; Chromatin organization, organism-specific biosystem; Condensation of Prophase Chromosomes, organism-specific biosystem; Disease,
