

WBP2 blocking peptide (DAG-PY1615)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Species	Human
Conjugate	unconjugated
Applications	IHC, WB
Reconstitution	Add 100ul of distilled water for a final peptide concentration is 1mg/ml
Format	Lyophilized powder.
Size	100 µg
Preservative	None
Storage	Store at -20°C long term. Avoid repeat freeze thaw cycles.

BACKGROUND

Introduction	The globular WW domain is composed of 38 to 40 semiconserved amino acids shared by proteins of diverse functions including structural, regulatory, and signaling proteins. The domain is involved in mediating protein-protein interactions through the binding of polyproline ligands. This gene encodes a WW domain binding protein, which binds to the WW domain of Yes kinase-associated protein by its PY motifs. The function of this protein has not been determined.
