

Vitamin B6 [OVA] (DAG-WT084)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview	Vitamin B6 conjugated with OVA
Species	N/A
Conjugate	OVA
Format	Liquid
Concentration	Batch dependent - please inquire should you have specific requirements.
Size	2 mg
Buffer	0.01M PBS, pH7.4
Preservative	None
Storage	Store at <4°C. Protect from light

BACKGROUND

Introduction	<p>Vitamin B6 is an important water-soluble vitamin that is naturally present in many foods. Vitamin B6 (and pyridoxine) are essential nutrients required for normal functioning of many biological systems within the body. While many plants and microorganisms are able to synthesize pyridoxine through endogenous biological processes, animals must obtain it through their diet.</p>
Keywords	Pyridoxine; Vitamin B6; VB6
